Explanatory Note: Display in the following charts.

- 1.For charts with "%" on the horizontal axis, this displays the percentage of respondents that selected each answer choice.
- 2.For questions that request a Ranked Response, the 'number scale' is the SurveyMonkey method of handling such questions. The 'score' considers the weight of the ranked position and the response count for answer choice. The answer choice with the largest average ranking is the most preferred choice. Further explanation of scoring for Survey Monkey Ranked Questions is explained at:
